

From idea to realization,
we master the solutions.

ONWI, design office and production line in electronics

Our activities

Our business statistics

2012

Business creation

.....
+ 30%
.....

Average annual
growth

16

People

.....
1,4 M€

Turnover in 2020

Our annual business statistics

+30,000

Board produced

+ 200

business handled

120

number of
customers

+ 20

design developed

Our markets

○ From startups to large groups
through SMEs

○ Local and international markets

○ Electronics in all its applications

- IoT
- Process control
- Consumer products
- Mobility / Electric assistance
- Medical
- Automotive
- Lighting
- Advanced measuring instruments
- Leisure environment...

New activities

Prototyping Department

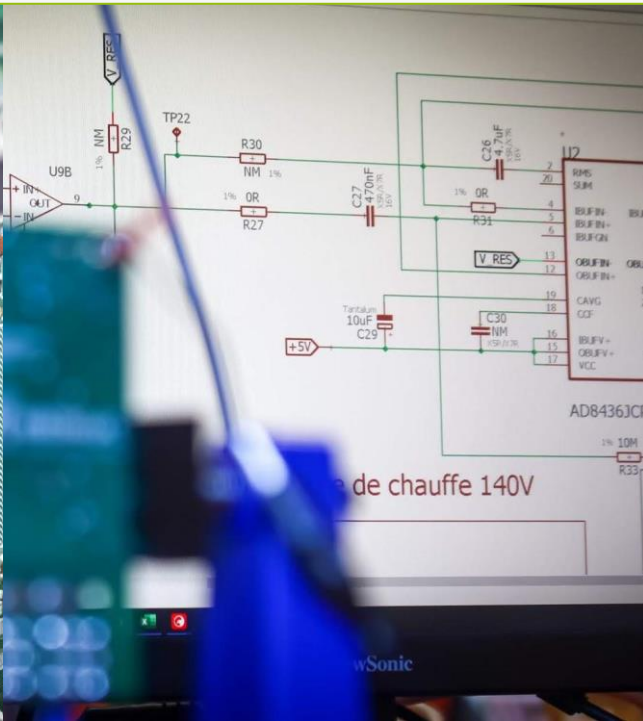

- Booming prototype activity
- Our acclaimed responsiveness
- All technologies down to 0201 (soon 01005) and BGA pitch 0.4mm

Integration & Assembly Department

- Integration of electronic boards into the mechanical design
- Overmolding board, connectors, splice etc.
- Assembly of the different components
- Tracking, traceability
- Shipping of finished product to the end customer

360° Projects

360° Projects

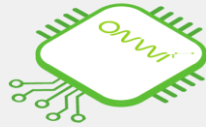

From the idea to the realization, we master the solutions

Thanks to its permanent monitoring, **ONWI** implements its skills and its experience to guide you in cutting-edge technological choices.

Study / Design

From your idea, we help you write the specifications adapted to your needs and the use of the product.

PROTOTYPE

Our engineers design electronic boards and embedded software. Prototypes are made in-house, giving us great responsiveness.

PRODUCTION

Thanks to our workshop and our production tools, we have the ability to make your PCBs and assemble them into the finished product.

FINISH / INTEGRATION

We can also carry out overmolding, wiring, machining and engraving, varnishing, tropicalization, and integration work.
